re: Declaration of Conformity

Dear Jon,

On behalf of Landis+Gyr I declare that the changes made to the P250 ecoMeter firmware from revision 01.016a to 01.017a and 01.016c to 01.017c, do not affect the ZigBee functionality or interface.

Firmware updates made were as follows:

1. A time configuration register has been introduced that controls the way the real time clock is displayed.
2. Changes to the value of the RF timeout threshold register have been introduced, which is used for detecting the loss of communication.

Yours sincerely,

Steve Riley
Project Manager
