## 120 **6 Introduction**

121  
122 To evaluate conformance of a particular implementation, it is necessary to have a statement of  
123 which capabilities and options have been implemented for a given standard. Such a statement is  
124 called a protocol implementation conformance statement (PICS).

### 125 **2.1 Scope**

126 This document provides the protocol implementation conformance statement (PICS) proforma  
127 for the ZigBee specifications cited in Reference [R2] in compliance with the relevant  
128 requirements, and in accordance with the relevant guidance, given in ISO/IEC 9646-7.

129  
130 This document addresses the ZigBee SE Application Profile.

### 131 **2.2 Purpose**

132 The supplier of a protocol implementation claiming to conform to the ZigBee SE Application  
133 Profile shall complete the following PICS proforma and accompany it with the information  
134 necessary to identify fully both the supplier and the implementation.

135  
136 The PICS is in the form of answers to a set of questions in the PICS proforma. The questions in a  
137 proforma consist of a systematic list of protocol capabilities and options as well as their  
138 implementation requirements. The implementation requirement indicates whether  
139 implementation of a capability is mandatory, optional, or conditional depending on options  
140 selected. When a protocol implementer answers questions in a PICS proforma, they would  
141 indicate whether an item is implemented or not, and provide explanations if an item is not  
142 implemented.

## 7 Abbreviations and special symbols

143  
144  
145  
146

Notations for requirement status:

M	Mandatory
O	Optional
O.n	Optional, but support of at least one of the group of options labeled O.n is required.
N/A	Not applicable
X	Prohibited
<i>Item</i>	Status is conditional on support of item number
<i>Number: :Status</i>	

147  
148  
149  
150  
151  
152  
153

“*Item Number*”: Conditional, status dependent upon the support marked for the “*Item Number*”.

For example, FD1: O.1 indicates that the status is optional but at least one of the features described in FD1 is required to be implemented, if this implementation is to follow the standard of which this PICS Proforma is a part.

**8 Instructions for completing the PICS proforma**

154

155

156 If a given implementation is claimed to conform to this standard, the actual PICS proforma to be  
157 filled in by a supplier shall be technically equivalent to the text of the PICS proforma in this  
158 annex, and shall preserve the numbering and naming and the ordering of the PICS proforma.

159

160 A PICS which conforms to this document shall be a conforming PICS proforma completed in  
161 accordance with the instructions for completion given in this annex.

162

163 The main part of the PICS is a fixed-format questionnaire, divided into five tables. Answers to  
164 the questionnaire are to be provided in the rightmost column, either by simply marking an  
165 answer to indicate a restricted choice (such as Yes or No), or by entering a value, set, or range of  
166 values.
