ZigBee Document 15-0320-05

April 18th, 2016

Sponsored by: ZigBee Alliance

Accepted by                      This document has been accepted for release by the ZigBee Alliance Board of Directors

Abstract                              This document describes the certification tests for devices which implement the ZCL Touchlink Commissioning cluster.

Keywords                              ZCL, Touchlink Commissioning, cluster

**Revision history**

<b>Revision</b>	<b>Date</b>	<b>Details</b>	<b>Editor</b>
00	May, 2015	Created from ZLL test specifications.	Phil Jamieson
01	August 12 <sup>th</sup> , 2015	Resolved comments received since the Hull test event in June 2015.	Phil Jamieson
02	September 28 <sup>th</sup> , 2015	Added the new mandatory global attributes.	Phil Jamieson
03	October 30 <sup>th</sup> , 2015	Removed the binding link preparatory step in all tests.	Phil Jamieson
04	March 1 <sup>st</sup> , 2016	Addressed comments from the ZigBee 3.0 SVEs.	Phil Jamieson
05	April 18 <sup>th</sup> , 2016	Changed status to "approved" and version to 1.0.	Phil Jamieson

## 80 **1 Introduction**

81 This document contains the PICS, test specification and PICS/test case cross reference for the  
82 *ZCL touchlink commissioning* cluster.

### 83 **1.1 Conformance levels**

84 The key words "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT",  
85 "RECOMMENDED" and "MAY" in this document are to be interpreted as described in [R5].

86

## 87 **2 References**

## 98 3 PICS

99 All references are for the ZigBee Cluster Library specification [R1] unless otherwise indicated.  
100 An XML version of these PICS is also available in [R3].  
101

### 102 3.1 Usage

Item number	Feature	Reference	Status	Support
TC.S	Does the device implement the <i>touchlink commissioning</i> cluster as a server?	13.3.2	O	Yes/No
TC.C	Does the device implement the <i>touchlink commissioning</i> cluster as a client?	13.3.3	O	Yes/No

103

### 104 3.2 Server

#### 105 3.2.1 Attributes

Item number	Feature	Reference	Status	Support
TC.S.Afffd	Does the device implement the <i>ClusterRevision</i> global attribute?	Table 2-1, 2.3.5.1.1	TC.S: M	Yes/No

106

#### 107 3.2.2 Commands received

Item number	Feature	Reference	Status	Support
TC.S.C00.Rsp	Does the device implement receiving the <i>scan request</i> command?	Table 13.13, 13.3.2.2.1	TC.S: M	Yes/No
TC.S.C02.Rsp	Does the device implement receiving the <i>device information request</i> command?	Table 13.13, 13.3.2.2.2	TC.S: M	Yes/No
TC.S.C06.Rsp	Does the device implement receiving the <i>identify request</i> command?	Table 13.13, 13.3.2.2.3	TC.S: M	Yes/No
TC.S.C07.Rsp	Does the device implement receiving the <i>reset to factory new request</i> command?	Table 13.13, 13.3.2.2.4	TC.S: M	Yes/No
TC.S.C10.Rsp	Does the device implement receiving the <i>network start request</i> command?	Table 13.13, 13.3.2.2.5	TC.S: M	Yes/No

Item number	Feature	Reference	Status	Support
TC.S.C12.Rsp	Does the device implement receiving the <i>network join router request</i> command?	Table 13.13, 13.3.2.2.6	TC.S: M	Yes/No
TC.S.C14.Rsp	Does the device implement receiving the <i>network join end device request</i> command?	Table 13.13, 13.3.2.2.7	TC.S: M	Yes/No
TC.S.C16.Rsp	Does the device implement receiving the <i>network update request</i> command?	Table 13.13, 13.3.2.2.8	TC.S: M	Yes/No
TC.S.C41.Rsp	Does the device implement receiving the <i>get group identifiers request</i> command?	Table 13.13, 13.3.2.2.9	TC.S: M	Yes/No
TC.S.C42.Rsp	Does the device implement receiving the <i>get endpoint list request</i> command?	Table 13.13, 13.3.2.2.10	TC.S: M	Yes/No

108

109 **3.2.3 Commands generated**

Item number	Feature	Reference	Status	Support
TC.S.C01.Tx	Does the device implement sending the <i>scan response</i> command?	Table 13.15, 13.3.2.3.1	TC.S: M	Yes/No
TC.S.C03.Tx	Does the device implement sending the <i>device information response</i> command?	Table 13.15, 13.3.2.3.2	TC.S: M	Yes/No
TC.S.C11.Tx	Does the device implement sending the <i>network start response</i> command?	Table 13.15, 13.3.2.3.3	TC.S: M	Yes/No
TC.S.C13.Tx	Does the device implement sending the <i>network join router response</i> command?	Table 13.15, 13.3.2.3.4	TC.S: M	Yes/No
TC.S.C15.Tx	Does the device implement sending the <i>network join end device response</i> command?	Table 13.15, 13.3.2.3.5	TC.S: M	Yes/No
TC.S.C40.Tx	Does the device implement sending the <i>endpoint information</i> command?	Table 13.15, 13.3.2.3.6	TC.S: M	Yes/No
TC.S.C41.Tx	Does the device implement sending the <i>get group identifiers response</i> command?	Table 13.15, 13.3.2.3.7	TC.S: M	Yes/No

Item number	Feature	Reference	Status	Support
TC.S.C42.Tx	Does the device implement sending the <i>get endpoint list response</i> command?	Table 13.15, 13.3.2.3.8	TC.S: M	Yes/No

110

## 111 3.3 Client

### 112 3.3.1 Attributes

Item number	Feature	Reference	Status	Support
TC.C.Afffd	Does the device implement the <i>ClusterRevision</i> global attribute?	Table 2-1, 2.3.5.1.1	TC.C: M	Yes/No

113

### 114 3.3.2 Commands received

Item number	Feature	Reference	Status	Support
TC.C.C01.Rsp	Does the device implement receiving the <i>scan response</i> command?	Table 13.19, 13.3.2.3.1	TC.C: M	Yes/No
TC.C.C03.Rsp	Does the device implement receiving the <i>device information response</i> command?	Table 13.19, 13.3.2.3.2	TC.C: M	Yes/No
TC.C.C11.Rsp	Does the device implement receiving the <i>network start response</i> command?	Table 13.19, 13.3.2.3.3	TC.C: M	Yes/No
TC.C.C13.Rsp	Does the device implement receiving the <i>network join router response</i> command?	Table 13.19, 13.3.2.3.4	TC.C: M	Yes/No
TC.C.C15.Rsp	Does the device implement receiving the <i>network join end device response</i> command?	Table 13.19, 13.3.2.3.5	TC.C: M	Yes/No
TC.C.C40.Rsp	Does the device implement receiving the <i>endpoint information</i> command?	Table 13.19, 13.3.2.3.6	TC.C: O	Yes/No
TC.C.C41.Rsp	Does the device implement receiving the <i>get group identifiers response</i> command?	Table 13.19, 13.3.2.3.7	TC.C.C41.Tx: M	Yes/No
TC.C.C42.Rsp	Does the device implement receiving the <i>get endpoint list response</i> command?	Table 13.19, 13.3.2.3.8	TC.C.C42.Tx: M	Yes/No

115

116 **3.3.3 Commands generated**

Item number	Feature	Reference	Status	Support
TC.C.C00.Tx	Does the device implement sending the <i>scan request</i> command?	Table 13.20, 13.3.2.2.1	TC.C: M	Yes/No
TC.C.C02.Tx	Does the device implement sending the <i>device information request</i> command?	Table 13.20, 13.3.2.2.2	TC.C: M	Yes/No
TC.C.C06.Tx	Does the device implement sending the <i>identify request</i> command?	Table 13.20, 13.3.2.2.3	TC.C: M	Yes/No
TC.C.C07.Tx	Does the device implement sending the <i>reset to factory new request</i> command?	Table 13.20, 13.3.2.2.4	TC.C: M	Yes/No
TC.C.C10.Tx	Does the device implement sending the <i>network start request</i> command?	Table 13.20, 13.3.2.2.5	TC.C: M	Yes/No
TC.C.C12.Tx	Does the device implement sending the <i>network join router request</i> command?	Table 13.20, 13.3.2.2.6	TC.C: M	Yes/No
TC.C.C14.Tx	Does the device implement sending the <i>network join end device request</i> command?	Table 13.20, 13.3.2.2.7	TC.C: M	Yes/No
TC.C.C16.Tx	Does the device implement sending the <i>network update request</i> command?	Table 13.20, 13.3.2.2.8	TC.C: M	Yes/No
TC.C.C41.Tx	Does the device implement sending the <i>get group identifiers request</i> command?	Table 13.20, 13.3.2.2.9	TC.C: O	Yes/No
TC.C.C42.Tx	Does the device implement sending the <i>get endpoint list request</i> command?	Table 13.20, 13.3.2.2.10	TC.C: O	Yes/No

117

## 118 4 Test specification

### 119 4.1 Introduction

#### 120 4.1.1 Test case overview

121 The following test cases are available for the *touchlink commissioning* cluster:

Test ID	Description	Reference
<b>Global tests</b>		
TC-TC-01G	Global attributes	4.2.1
<b>Server side tests</b>		
TC-TC-01S	Secondary functionality with server as DUT	4.3.1
<b>Client side tests</b>		
TC-TC-01C	Functionality with client as DUT	4.4.1

122  
 123 NOTE: Implementations of the *touchlink commissioning* cluster SHALL also satisfy the  
 124 touchlink commissioning test cases specified in the Base Device Behavior Test Specification  
 125 [R4].

#### 126 4.1.2 Testing tolerances

127 In test cases where a change in an attribute value is tested over time, it is permitted for the  
 128 devices involved in the test to be within a tolerance of  $\pm 15\%$  of the expected value. As such,  
 129 these test cases indicate that the attribute value must be approximately equal to an expected  
 130 value, to which the  $\pm 15\%$  tolerance should then be applied. All other attribute values presented  
 131 are expected to be exact.

#### 132 4.1.3 Client DUTs

133 For client test cases only test steps that pertain to commands that are supported on the DUT are  
 134 required to be executed. All commands in this cluster for which support is indicated in the  
 135 PICS shall be exercised, using valid, application achievable values.

136 Note that for the client attribute test case, it is permissible for the client not to be able to  
 137 execute any of the test steps.

138 The client SHALL ensure that an application link, e.g. a binding link, exists between itself and  
 139 the test harness. This should be configured before starting the test.

#### 140 4.1.4 Test steps manipulating attributes

141 In test case steps that require more than one attribute to be manipulated (e.g. read), the tester  
 142 may decide whether it is appropriate or practical to send a single attribute manipulation  
 143 command, containing multiple attributes, or multiple attribute manipulation commands, each  
 144 containing a single attribute. The test case is designed to verify the behavior of the device  
 145 supporting the attribute rather than verifying the attribute manipulation command in question.

## 146 4.2 Generic test cases

### 147 4.2.1 TC-TC-01G: Global attributes

148 This test case verifies the behavior of the global attributes of the *touchlink commissioning*  
149 cluster client and server.

150 In this test, the PICS notation TC.S.Agm and TC.C.Agm represents the list of global attributes  
151 that are specified as being mandatory for either the server or client, respectively. Similarly, the  
152 PICS notation TC.S.Ago and TC.C.Ago represents the list of global attributes that are specified  
153 as being optional for either the server or client, respectively.

#### 154 4.2.1.1 Scope

155 General:

- 156 • *Read attributes* command (0x00)
- 157 • *Read attributes response* command (0x01)
- 158 • *Write attributes* command (0x02)
- 159 • *Write attributes response* command (0x04)

160 *Touchlink commissioning* cluster (0x1000):

- 161 • All global attributes

162 PICS:

- 163 • TC.S, TC.C
- 164 • TC.S.Agm, TC.C.Agm, TC.S.Ago, TC.C.Ago

#### 165 4.2.1.2 Required devices

Designation	Symbol	Description
DUT		Device under test implementing: <ul style="list-style-type: none"> <li>• The <i>touchlink commissioning</i> cluster server or client.</li> </ul>
TH		Test harness implementing: <ul style="list-style-type: none"> <li>• The <i>touchlink commissioning</i> cluster client or server, i.e. the opposite cluster instantiation as implemented on the DUT.</li> </ul>

166

167 **4.2.1.3 Initial conditions**

Item	Initial Conditions
1	A packet sniffer shall be observing the communication over the air interface.
2	All devices are factory new and powered off until used.

168

169 **4.2.1.4 Test preparation**

170

<b>TC-TC-01G: Global attributes</b>		
Item	Preparation Step	Observation
P1	Form a ZigBee network.	Observe appropriate command frame to form the network.
P2	Power on TH and DUT.	TH and DUT are powered on.
P3	Join TH and DUT to a ZigBee network.	Observe appropriate communication between TH, DUT and any other relevant node on the ZigBee network.

--- End of test case TC-TC-01G preparation ---

171

## 172 4.2.1.5 Test procedure

TC-TC-01G: Global attributes			
Item	PICS	Test Harness Step	DUT pass Verification
1	TC.S.Agm, TC.C.Agm	TH unicasts a ZCL <i>read attributes</i> command frame to DUT to read each mandatory global attribute of this cluster one at a time.	DUT unicasts a ZCL <i>read attributes response</i> command frame to TH containing each requested attribute.  The data type in each command must match the value listed in the specification(s). The data value in each command for the attribute must fall within the valid range described in the specification(s).
2a	TC.S.Agm, TC.C.Agm	TH unicasts a ZCL <i>write attributes</i> command frame to DUT to write the respective default value to each mandatory global attribute of this cluster one at a time.	DUT unicasts a ZCL <i>write attributes response</i> command frame to TH for each attribute.  If the access control of DUT is set to READ, the DUT response will indicate that the attribute write command was not a SUCCESS. If the access control of DUT is set to READ/WRITE, the DUT response will indicate that the write command was a SUCCESS.
2b	TC.S.Agm, TC.C.Agm	TH unicasts a ZCL <i>read attributes</i> command frame to DUT to read back each attribute written in step 2a.	DUT unicasts a ZCL <i>read attributes response</i> command frame to TH containing the requested attribute.  If the <i>Status</i> field of the <i>write attributes response</i> command frame was equal to SUCCESS, the updated value is read back. If the <i>Status</i> field of the <i>write attributes response</i> command frame was not equal to SUCCESS the value is not updated when read back.

Continued...

<b>TC-TC-01G: Global attributes</b>			
<b>Item</b>	<b>PICS</b>	<b>Test Harness Step</b>	<b>DUT pass Verification</b>
3	TC.S.Ago, TC.C.Ago	TH unicasts a ZCL <i>read attributes</i> command frame to DUT to read each optional global attribute of this cluster one at a time.	DUT unicasts a ZCL <i>read attributes response</i> command frame to TH containing each attribute.  If the DUT implements the attribute, the <i>Status</i> field will be equal to SUCCESS and the command will contain the requested attribute. If the DUT does not implement the attribute, the <i>Status</i> field will not be equal to SUCCESS.  The data type in each command must match the value listed in the specification(s). The data value in each command for the attribute must fall within the valid range described in the specification(s).
4a	TC.S.Ago, TC.C.Ago	TH unicasts a ZCL <i>write attributes</i> command frame to DUT to write the respective default value to each optional global attribute of this cluster one at a time.	DUT unicasts a ZCL <i>write attributes response</i> command frame to TH for each attribute.  If the attribute is not implemented or the access control of DUT is set to READ, the DUT response will indicate that the attribute write command was not a SUCCESS. If the attribute is implemented and the access control of DUT is set to READ/WRITE, the DUT response will indicate that the write command was a SUCCESS.
4b	TC.S.Ago, TC.C.Ago	TH unicasts a ZCL <i>read attributes</i> command frame to DUT to read back each attribute written in step 4a.	DUT unicasts a ZCL <i>read attributes response</i> command frame to TH containing the requested attribute.  If the <i>Status</i> field of the <i>write attributes response</i> command frame was equal to SUCCESS, the updated value is read back. If the <i>Status</i> field of the <i>write attributes response</i> command frame was not equal to SUCCESS the value is not updated when read back.

--- End of test case TC-TC-01G ---

## 174 4.3 Server test cases

### 175 4.3.1 TC-TC-01S: Secondary functionality with server as DUT

176 This test verifies the secondary functionality of the *touchlink commissioning* cluster.

177 It is assumed that DUT SERVER has a least one group identifier that it can use to control other  
178 devices.

#### 179 4.3.1.1 Scope

180 General:

- 181 • *Default response* command (0x0b)

182 *Touchlink commissioning* cluster (0x1000):

- 183 • *Endpoint information* command (0x40)
- 184 • *Get group identifiers request* command (0x41)
- 185 • *Get group identifiers response* command (0x41)
- 186 • *Get endpoint list request* command (0x42)
- 187 • *Get endpoint list response* command (0x42)

188 PICS:

- 189 • TC.S
- 190 • TC.S.C41.Rsp, TC.S.C42.Rsp
- 191 • TC.S.C40.Tx – TC.S.C42.Tx

#### 192 4.3.1.2 Required devices

Designation	Symbol	Description
TH SERVER		Test harness server implementing: <ul style="list-style-type: none"> <li>• The <i>touchlink commissioning</i> cluster client.</li> </ul>
DUT CLIENT		Device under test client implementing: <ul style="list-style-type: none"> <li>• The <i>touchlink commissioning</i> cluster server.</li> </ul>
THr1		Test harness capable of forming a distributed network.

193

#### 194 4.3.1.3 Initial conditions

Item	Initial Conditions
1	A packet sniffer shall be observing the communication over the air interface.
2	All devices are factory new and powered off until used.

195

196 **4.3.1.4 Test preparation**

197

<b>TC-TC-01S: Secondary functionality with server as DUT</b>		
Item	Preparation Step	Observation
P1	Form a ZigBee distributed network with THr1.	Observe appropriate command frame to form the network.
P2	Power on TH CLIENT and DUT SERVER.	TH CLIENT and DUT SERVER are powered on.
P3	Touchlink TH CLIENT with THr1. Touchlink DUT SERVER with THr1.	Observe appropriate communication between TH CLIENT, DUT SERVER and THr1.

*--- End of test case TC-TC-01S preparation ---*

198

199

200 **4.3.1.5 Test procedure**

<b>TC-TC-01S: Secondary functionality with server as DUT</b>			
<b>Item</b>	<b>PICS</b>	<b>Test Harness Step</b>	<b>DUT Pass Verification</b>
1a	TC.S.C40.Tx	If supported, user instigates DUT SERVER to send a ZCL <i>endpoint information</i> command to announce one of the endpoints bound with THr1.	DUT SERVER unicasts a ZCL <i>endpoint information</i> command frame to TH CLIENT with the <i>IEEE address</i> field set to the IEEE address of DUT SERVER, the <i>network address</i> field set to the network address of DUT SERVER and the remaining fields set to information about an endpoint on DUT SERVER that was bound with THr1.
1b	-	TH CLIENT unicasts a ZCL <i>default response</i> command frame to DUT SERVER with the <i>status</i> field set to 0x00 (SUCCESS).	None.
2	TC.S.C41.Rsp, TC.S.C41.Tx	TH CLIENT unicasts a ZCL <i>get group identifiers request</i> command frame to DUT SERVER with the <i>start index</i> field set to 0x00.	DUT SERVER unicasts a ZCL <i>get group identifiers response</i> command frame to TH CLIENT with the <i>total</i> field set to at least 0x01, the <i>start index</i> field set to 0x00, the <i>count</i> field set to at least 0x01 and <i>count</i> group information records, each containing <i>group identifier/group type</i> field pairs appropriate for the device.
3	TC.S.C42.Rsp, TC.S.C42.Tx	TH CLIENT unicasts a ZLL <i>get endpoint list request</i> command frame to DUT SERVER with the <i>start index</i> field set to 0x00.	DUT SERVER unicasts a ZLL <i>get endpoint list response</i> command frame to TH CLIENT with the <i>total</i> field set to 0x01, the <i>start index</i> field set to 0x00, the <i>count</i> field set to 0x01 and a single <i>endpoint information record</i> entry containing the information from the binding with THr1.

## 203 4.4 Client test cases

### 204 4.4.1 TC-TC-01C: Functionality with client as DUT

205 This case test verifies the functionality of the *touchlink commissioning* cluster client.

206 The DUT client SHALL be on the same network as a suitable server, provided by the user, and  
 207 this device SHALL be used by the client to exercise its functionality. The test case uses the  
 208 test harness to prompt the user, based on the declared PICS, to exercise the functionality of the  
 209 *basic* cluster client and to verify the results. A sniffer tool SHALL be used to log the exercised  
 210 functionality and to determine its validity.

211 In this test case, the PICS notation TC.C.CdTx represents the list of commands that are  
 212 declared as being transmitted by the DUT.

#### 213 4.4.1.1 Scope

214 *Touchlink commissioning* cluster (0x1000):

- 215 • *Get group identifiers request* command (0x41)
- 216 • *Get endpoint list request* command (0x42)

217 PICS:

- 218 • TC.C
- 219 • TC.C.C41.Tx – TC.C.C42.Tx

#### 220 4.4.1.2 Required devices

Designation	Symbol	Description
DUT CLIENT		Device under test client implementing: <ul style="list-style-type: none"> <li>• The <i>touchlink commissioning</i> cluster client.</li> </ul>
SERVER		Suitable server device implementing: <ul style="list-style-type: none"> <li>• The <i>touchlink commissioning</i> cluster server.</li> </ul>

221

#### 222 4.4.1.3 Initial conditions

Item	Initial Conditions
1	A packet sniffer shall be observing the communication over the air interface.
2	All devices are factory new and powered off until used.

223

224

225

226 **4.4.1.4 Test preparation**

227

<b>TC-TC-01C: Functionality with client as DUT</b>		
<b>Item</b>	<b>Preparation Step</b>	<b>Observation</b>
P1	Power on the DUT CLIENT device and the SERVER device.	DUT CLIENT and SERVER are powered on.
P2	Ensure the DUT CLIENT device and the SERVER device are on the same ZigBee network.	Observe appropriate communication between DUT CLIENT, SERVER and any other relevant node on the ZigBee network.

*--- End of test case TC-TC-01C preparation ---*

228

229

230 **4.4.1.5 Test procedure**

<b>TC-TC-01C: Functionality with client as DUT</b>			
<b>Item</b>	<b>PICS</b>	<b>Test Harness Step</b>	<b>DUT Pass Verification</b>
1	-	Test harness prompts the user with a list of commands, based on the declared PICS, which the DUT CLIENT indicates it can transmit.	None.
2	TC.C.Cd.Tx	None.	DUT CLIENT transmits correctly formed commands in any order and with application achievable values. This is verified using the sniffer log.
3	-	Prompt the user to verify that the cluster commands listed in step 1 were transmitted during step 2.	During step 2, DUT CLIENT has transmitted every command listed by the test harness in step 1.
4	-	Prompt the user to verify that the cluster commands not listed in step 1 were not transmitted during step 2.	During step 2, DUT CLIENT has not transmitted any commands from this cluster that were not listed by the test harness in step 1.
