ZIGBEE SMART ENERGY STANDARD

Protocol Implementation Conformance Statement (PICS)

Revision 7

Version 1.1b

Sponsored by: ZigBee Alliance

Accepted by: ZigBee Alliance Board of Directors

Abstract: This document lists the PICS for the Smart Energy Standard.

Purpose: Provides a pro-forma on which the capabilities and options of a particular implementation of the Smart Energy Standard can be stated.

Keywords: ZigBee, Qualification, Certification, Standard, Smart Energy, Metering, Energy Management

116 **2 Introduction**

117
118 To evaluate conformance of a particular implementation, it is necessary to have a statement of
119 which capabilities and options have been implemented for a given standard. Such a statement is
120 called a protocol implementation conformance statement (PICS).

121 **2.1 Scope**

122 This document provides the protocol implementation conformance statement (PICS) pro forma
123 for the ZigBee specifications cited in Reference [R2] in compliance with the relevant
124 requirements, and in accordance with the relevant guidance, given in ISO/IEC 9646-7.

125
126 This document addresses the ZigBee SE Application Profile.

127 **2.2 Purpose**

128 The supplier of a protocol implementation claiming to conform to the ZigBee SE Application
129 Profile shall complete the following PICS pro forma and accompany it with the information
130 necessary to identify fully both the supplier and the implementation.

131
132 The PICS is in the form of answers to a set of questions in the PICS pro forma. The questions in
133 a pro forma consist of a systematic list of protocol capabilities and options as well as their
134 implementation requirements. The implementation requirement indicates whether
135 implementation of a capability is mandatory, optional, or conditional depending on options
136 selected. When a protocol implementer answers questions in a PICS pro forma, they would
137 indicate whether an item is implemented or not, and provide explanations if an item is not
138 implemented.

3 Abbreviations and special symbols

139
140
141
142

Notations for requirement status:

M	Mandatory
O	Optional
O.n	Optional, but support of at least one of the group of options labeled O.n is required.
N/A	Not applicable
X	Prohibited
<i>Item Number:</i> <i>:Status</i>	Status is conditional on support of item number

143
144
145
146
147
148
149

“*Item Number*”: Conditional, status dependent upon the support marked for the “*Item Number*”.

For example, FD1: O.1 indicates that the status is optional but at least one of the features described in FD1 is required to be implemented, if this implementation is to follow the standard of which this PICS Pro forma is a part.

4 Instructions for completing the PICS pro forma

150
151
152 If a given implementation is claimed to conform to this standard, the actual PICS pro forma to be
153 filled in by a supplier shall be technically equivalent to the text of the PICS pro forma in this
154 annex, and shall preserve the numbering and naming and the ordering of the PICS pro forma.

155
156 A PICS which conforms to this document shall be a conforming PICS pro forma completed in
157 accordance with the instructions for completion given in this annex.

158
159 The main part of the PICS is a fixed-format questionnaire, divided into five tables. Answers to
160 the questionnaire are to be provided in the rightmost column, either by simply marking an
161 answer to indicate a restricted choice (such as Yes or No), or by entering a value, set, or range of
162 values.

6 Identification of the protocol

242

243

This PICS pro forma applies to ZigBee SE Application Profile, cited in Reference [R2].

7 Global statement of conformance

244
245
246 The implementation described in this PICS pro forma meets all of the mandatory requirements of
247 the referenced standards:

248
249 Application Profile: ZigBee SE – 07-5356-18
250

251 Yes

252 No

253
254 Note -- Answering ‘No’ indicates non-conformance to the specified protocol standard. Non-
255 supported mandatory capabilities are to be identified in the following tables, with an explanation
256 by the implementer explaining why the implementation is non-conforming.

257
258 The supplier will have fully complied with the requirements for a statement of conformance by
259 completing the statement contained in this sub-clause. That means, by clicking the above, the
260 statement of conformance is complete.
261

262 8 PICS pro forma tables

263
264 The following tables are composed of the detailed questions to be answered, which make up the
265 PICS pro forma.
266

267 8.1 ZigBee Device Types

268 Table 2 - Functional device types
