

Over-the-air Bootload Cluster

Protocol Implementation Conformance Statement (PICS)

Revision 10

Sponsored by:
ZigBee Alliance

Accepted for release by:
ZigBee Alliance Board of Directors.

Abstract:
This document lists PICS for the Over-the-air Bootload cluster.

Abstract:
Provides a pro-forma on which the capabilities and options of a particular implementation of the Over-the-air Bootload cluster can be stated.

Keywords:
Qualification, Certification, Metering, Energy Management

2 Introduction

To evaluate conformance of a particular implementation, it is necessary to have a statement of which capabilities and options have been implemented for a given standard. Such a statement is called a protocol implementation conformance statement (PICS).

2.1 Scope

This document provides the protocol implementation conformance statement (PICS) pro-forma for the ZigBee specifications cited in Reference [R2] in compliance with the relevant requirements, and in accordance with the relevant guidance, given in ISO/IEC 9646-7.

This document addresses the ZigBee SE Application Profile.

2.2 Purpose

The supplier of a protocol implementation claiming to conform to the ZigBee SE Application Profile shall complete the following PICS pro-forma and accompany it with the information necessary to identify fully both the supplier and the implementation.

The PICS is in the form of answers to a set of questions in the PICS pro-forma. The questions in a pro-forma consist of a systematic list of protocol capabilities and options as well as their implementation requirements. The implementation requirement indicates whether implementation of a capability is mandatory, optional, or conditional depending on options selected. When a protocol implementer answers questions in a PICS pro-forma, they would indicate whether an item is implemented or not, and provide explanations if an item is not implemented.

3 Abbreviations and special symbols

Notations for requirement status:

| | |
|---------------------------------------|--|
| M | Mandatory |
| O | Optional |
| O.n | Optional, but support of at least one of the group of options labeled O.n is required. |
| N/A | Not applicable |
| X | Prohibited |
| <i>Item Number:</i> <i>:Status</i> | Status is conditional on support of item number |

“*Item Number*”: Conditional, status dependent upon the support marked for the “*Item Number*”.

For example, FD1: O.1 indicates that the status is optional but at least one of the features described in FD1 is required to be implemented, if this implementation is to follow the standard of which this PICS Pro-forma is a part.

4 Instructions for completing the PICS pro-forma

- 2
- 3 If a given implementation is claimed to conform to this standard, the actual PICS pro-forma to be
- 4 filled in by a supplier shall be technically equivalent to the text of the PICS pro-forma in this
- 5 annex, and shall preserve the numbering and naming and the ordering of the PICS pro-forma.
- 6
- 7 A PICS which conforms to this document shall be a conforming PICS pro-forma completed in
- 8 accordance with the instructions for completion given in this annex.
- 9
- 10 The main part of the PICS is a fixed-format questionnaire, divided into five tables. Answers to
- 11 the questionnaire are to be provided in the rightmost column, either by simply marking an
- 12 answer to indicate a restricted choice (such as Yes or No), or by entering a value, set, or range of
- 13 values.

PICS/System conformance statement

6 Identification of the protocol

2

3 This PICS pro-forma applies to ZigBee SE Application Standard, cited in Reference [R2].

7 Global statement of conformance

The implementation described in this PICS pro-forma meets all of the mandatory requirements of the referenced standards:

Application Profile: ZigBee SE – 075356r20
Cluster Profile : Over-the-air Bootload – 14-0135-14

☒ Yes

☐ No

Note -- Answering ‘No’ indicates non-conformance to the specified protocol standard. Non-supported mandatory capabilities are to be identified in the following tables, with an explanation by the implementer explaining why the implementation is non-conforming.

The supplier will have fully complied with the requirements for a statement of conformance by completing the statement contained in this sub-clause. That means, by clicking the above, the statement of conformance is complete.

8 PICS pro-forma tables

The following tables are composed of the detailed questions to be answered, which make up the PICS pro-forma.

8.1 OTA Upgrade Device Classes
