Twist-n-Shout®

Hydrangea macrophylla 'PIIHM-I' (D) Twist-n-Shout®

Another quality *Hydrangea* in the Endless Summer® collection, Twist-n-Shout® is a vibrant re-blooming lacecap cultivar ideal potted or in the garden. This *Hydrangea* has the unique ability to bloom on both old and new growth. The flowers cut perfectly for spectacular indoor colour, with more blooms always on the way.

- Climate:** Cool temperate to warm temperate.
- Soil:** Adaptable to most well-drained soil types. Keep soil evenly moist. Mulching is beneficial. Tolerant of both acidic and alkaline soils.
- Planting:** Dig a hole one and half times wider than container the plant came in. Roughen the sides and bottom of the root ball. Top of the root ball should be level with surrounding soil surface. Fill in around the roots with soil, and water in your plant thoroughly. Mulch is beneficial after planting.
- Fertiliser:** *Hydrangeas* may require a slow release fertiliser in early spring for good flower production. Over feeding *hydrangeas* may result in dark green leaf production with fewer flowers.
- Blooms:** Flower colour will change depending upon soil pH - pink blooms are produced in alkaline soil and blue blooms in acidic soil.
- Size:** 1.2 x 1.2 metres.
- Culture:** Endless Summer® *Hydrangea* bloom on both new and old wood, and re-occur in bloom during summer and early autumn.
