

RED TWIG DOGWOOD

Cornus sericea f. baileyi

A red-stemmed *Cornus* producing a striking winter display when its leaves are absent. This is an excellent garden plant for massed or individual planting in parks or garden shrub borders to enhance winter garden landscapes.

- Foliage:** Bluish-green, lustrous leaves up to 12 cm long, turning purplish-red in autumn.
- Flowers:** Creamy-white flowers borne in flat-topped cymes up to 6 cm wide in late spring and intermittently through summer.
- Fruit:** White drupes up to 7 mm in diameter.
- Culture:** Tolerant of a range of conditions but best in moist, well-drained soils. Periodic removal of stems encourages vigorous new coloured stem growth. May be susceptible to canker. Adaptable to temperate areas.
- Size:** 2.5 x 3 metres.
- Plant Care:** For more information on planting, maintenance and care visit flemings.com.au
