

Don't strangle your tree. Please remove label and tie, and file label for reference. Illustrations and notes intended as a guide only. Estimated size at 20 years.

TRIDENT MAPLE

Acer buergerianum

Displays outstanding heat and dry-soil tolerance as well as coping with semi-drought conditions making *A. buergerianum* excellent as a tree for parks and gardens in urban areas. An attractive, small, hardy tree with good autumn colour. Generally seedling grown, so can be quite variable in habit and foliage characteristics.

- Foliage:** Shiny, triangular tri-lobed leaves have three main veins and a broad base. The spring growth is coppery-red, maturing to bright dark green in summer and then turning to a brilliant greenish-red and orange in autumn.
- Flowers:** Inconspicuous, greenish-white flowers borne in corymbs late spring.
- Fruit:** Green winged samaras, borne in pairs, ripen to reddish brown in autumn.
- Culture:** Tolerant of atmospheric pollution, semi-drought conditions and shows some wind resistance with good structural strength. Generally has good resistance to pests and diseases.
- Size:** 6 x 6 metre.
- Care:** For more information on planting, maintenance and care visit flemings.com.au

Bare-root pruning:

Prune each limb by 50% just above a bud.
Remove all broken or any unwanted limbs.
