NATIVE INTRODUCTIONS

Corymbia maculata

'Gamai'

SPOTTED GUM

Fleming's NURSERIES

CELEBRATING 100 YEARS

Don't strangle your tree. Please remove label and tie, and file label for reference. Illustrations and notes intended as a guide only. Estimated size at 20 years.

SPOTTED GUM
Corymbia maculata
'Gamai'

Fleming's Nurseries is excited to introduce this superior fastigiate *Corymbia maculata* that has been asexually propagated on its own roots ensuring a very consistent, uniform tree. 'Gamai' is an indigenous word from the Dharawal people meaning 'spear' which reflects its very tall, narrow form. Perfect for use in urban design such as street trees and large parks and gardens where uniformity is highly desirable. Part of Fleming's emerging collection of Australian native introductions.

Foliage: Dark green, lanceolate leaves to 15cm in length.

Flowers: Creamy coloured flowers in terminal clusters are produced in spring.

Fruit: Brown urn-shaped capsules.

Culture: Adapatable to a range of conditions. Trials show moderate drought tolerance and some tolerance of coastal exposure.

Size: 12 x 4 metres.

Care: For more information on planting, maintenance and care visit **flemings.com.au**
