

NATIVE  
INTRODUCTIONS

Don't strangle your tree. Please remove label and tie, and file label for reference. Illustrations and notes intended as a guide only. Estimated size at 20 years.

## *Eucalyptus robusta* 'Matong' (D)

Fleming's Nurseries is excited to introduce this superior form of *Eucalyptus robusta* that has been asexually propagated on its own roots ensuring a very consistent, uniform tree. Perfect for use in urban design such as street trees and large parks and gardens where uniformity is highly desirable. Part of Fleming's emerging collection of Australian native introductions.

- Foliage:** Thick leathery foliage is an attractive deep bronze tone when young, maturing to a dark green.
- Flowers:** Creamy white flowers, with tinges of pink are produced during late winter, usually in clusters of seven.
- Fruit:** Conical shaped capsules approximately 1cm in width.
- Culture:** Like the species this tree is a strong grower, but is consistently more compact and refined than is typical for the species.
- Size:** 15 x 7 metres.
- Care:** For more information on planting, maintenance and care visit [flemings.com.au](http://flemings.com.au)

PBR(D) Unauthorized commercial propagation or sale, conditioning, export, import or stocking of propagating material of this variety is an infringement under the Australia Plant Breeder's Rights Act 1994
